

## CCSHCN seeks feedback on block grant application

Each year, states are required to submit an application and annual report for federal funds for their Maternal and Child Health Services Title V Block Grants. The Commission for Children with Special Health Care Needs, as the provider of services for children and youth with special needs, is asking for feedback from the public about our application.

The CCSHCN provided and promotes family-centered, community-based, coordinated care (including care coordination services) for children and youth and facilitating the development of community-based systems of services.
